

Assignment #3

Assignment overview

- Implement the following events using JavaScript.
- Only the assignment.js file can be edited.

Condition

1. Write a loop to seek out all the img tags with the newly defined class (hint. `querySelectorAll`)
2. For each image, attach a listener on the `mouseover` event to create a new `` with a larger image inside.
3. Add another listener on the `mouseout` event to hide the newly created ``.
4. The style of the new `` tag with a larger image inside is also given a partial score.

Paintings
